BIO

I am an Earth scientist specialising in magnetotellurics. My research targets how the electrical conductivity distribution of the lithospheric mantle, as it is acquired from magnetotelluric models, can be related to tectonic and magmatic processes. I try to do this via quantified interpretations, combining the knowledge from geochemistry, petrology and magnetotellurics.

EDUCATION

PhD in Geophysics at Macquarie University

2018 - 2021

Sydney, Australia

Thesis Title: “Three-dimensional magnetotelluric constraints on compositional variations of the Southern African mantle.”

Supervisors: Kate Selway (Primary), William L. Griffin (Associate)

MSc in Geophysics at Boğaziçi University

2015 - 2017

Istanbul, Turkey

Thesis Title: “The role of crustal fluids in tectonics of north-central Turkey, inferred from three-dimensional magnetotellurics.”

Supervisors: S. Bülent Tank

BS. in Geophysical Engineering at Istanbul Technical University

2009-2015

Istanbul, Turkey

RESEARCH INTERESTS

Magnetotellurics, geophysical inversion, geochemistry, quantified interpretations of mantle electrical conductivities.
